### Note

1. Refrigerant leakage contributes to climate change. Refrigerants with lower global warming potential (GWP) result in less impact on global warming than a refrigerant with higher GWP. (Refer to the information in the manual. This product contains a refrigerant fluid with a GWP equal to 134a. The level of GWP varies according to the amount of refrigerant in the unit. The indoor unit contains 134a refrigerant fluid amount equal to 1.6 kg. The life of the refrigerant fluid is estimated to be 10 years. Refrigerant leakage is considered to be an incidental failure, and the product should be serviced and repaired by a professional.
2. The GWP rating is based on the GWP of 2366 for HFC-236fa. The GWP rating of 134a is based on the GWP of 134a.
3. The energy consumption of this product is determined based on JSNEC test method. The GWP rating of the refrigerant fluid is based on the GWP of 2366 for HFC-236fa. The energy consumption of this product is determined based on JSNEC test method. The GWP rating of the refrigerant fluid is based on the GWP of 2366 for HFC-236fa.
